

BRISTOL IS FACING A CRISIS

The air of our city is damaging our health, communities, businesses, and climate. Bristol City Council has known this for decades but is only now taking minimal action to make our air legal. Legal air is not healthy air. We need more! 'Our Air, Our City' is uniting communities and groups from across Bristol to shout for healthy air with one voice.

CLEAN AIR FOR A BETTER BRISTOL

Acting on dirty air will not only save lives but improve our quality of life. By cleaning our air our communities will be happier and more connected. Our city will be safer and more enjoyable for playing, walking and cycling. Our economy will be more prosperous, and our transport greener and more just. Our wildlife will be more diverse and robust, and the future of our planet will be healthier.

FLY THE FLAG FOR CLEAN AIR

A better Bristol **is** possible, but we need your help to bring it into being.

- Please show your support. **Put this poster in your window - colour it in if you like!**

AIR POLLUTION: THE FACTS

- **300 deaths per year** are attributed to dirty air in Bristol.
- Science suggests **14% of Coronavirus** of deaths can be attributed to air pollution.
- Dirty air contributes to many health conditions, including: asthma, impaired lung function, and premature heart disease.
- The areas with the worst air pollution in Bristol are Bedminster, Brislington, Easton, Lawrence Hill, St Pauls, Stapleton, Stokes Croft, and Totterdown. Yet many of these communities are the least responsible for causing the air pollution that they suffer from.
- The monetary benefit of acting on Bristol's dirty air is estimated at **£80 million** a year.
- Air pollution causes acid rain, and contributes to biodiversity loss and global warming.
